ESPC

SAVINGS INFORMATION

Energy and operational savings
over \$575k annually

Nestled between the banks of the Ohio River and our ESG headquarters, the Warrick County Courthouse was struggling with aging infrastructure and constant repairs. They partnered with ESG to design and renovate the Courthouse while implementing comprehensive energy conservation measures to the Judicial Center as well.

SOLUTION

The following energy conservation measures were implemented:

- New variable refrigerant heating, ventilation, and air conditioning systems
- Data cabling, ceilings, restrooms, flooring, doors, and window renovations
- Historical restoration of the exterior limestone and monument of the courthouse
- Provisions for a standby generator
- Corrections to exterior drainage system

RESULTS

From their partnership with Energy Systems Group, Warrick County now has a renovated, energy efficient Courthouse and Judicial Center. The has not only offered energy and operational of 575+ annually but the workers of Warrick County and the citizens have a improved environment to that matches the strong commitment Warrick County promises to their constituents.
